

ELEMON

PITCH DECK

ELEMON X CORSAIR

STRATEGIC  
PARTNERSHIP

## Dear Elemonians!

We are delighted to welcome you into the world of Elemons, where you can enjoy the best gaming experience in the blockchain space, and earn money at the same time!

Our game development team come from the traditional gaming market, with over ten years of experience working with multiple genres of world-class games. As insiders in the field, we know that each year, gamers spend a huge amount of money on in-game purchases, while receiving almost nothing in return. Therefore, over the years, we have been looking for a way to bring more values to our game players. Now, we can...

# OUR MOTIVATION AND WHY?

The Game industry (and also NFT use) has quickly become one of the main drivers of blockchain adoption among the general public. Many giants of the gaming world have understood this well and are investing colossal sums in the development of video games based on the blockchain or features taking advantage of this technology. From now and years to come, the blockchain and its countless possibilities promise to invade the daily lives of gamers.

The phenomenal success of the Pokémon Go - a game developed by Nintendo that helped bring augmented reality to people's daily lives also inspired the incubation of this revolutionary blockchain project.

Elemon's mission is to build an integrated digital platform of tokenized monsters that appeals to the average consumers as they can play games and make a profit thanks to the Blockchain technology. This is why Elemon has found a way to combine the blockchain-based gaming world and NFT in a next-generation concept and created a digital platform universe of unique digital creatures.

The future of blockchain games will first come through Non-Fungible Tokens (NFTs).

## OUR TEAM

Elemon team is composed of top game developers with years of experience creating games with stunning visuals and addictive gameplay, and a team of blockchain expert developers with experience in all aspects of blockchain technology. We have worked with blockchain projects by the government and other state enterprises. On top of that, the team also consists of veteran blockchain investors with many successful projects.

Our ambition is to build a leading NFT ecosystem in the blockchain space that delivers sustainable values to users and investors. We come from a traditional gaming market, but as we discovered NFT technology and its implications on the gaming industry, we now have the ambition to incorporate NFTs into gaming to bring users the best gaming experience.

The comprehensive ecosystem includes Elemon - The NFT Fantasy - Themed RPG on Binance Smart Chain, the highly - liquid NFT Marketplace, collectibles, and the Elemon community.

Our philosophy is to focus on user experience, to bring them the smoothest and most satisfying games in the blockchain world.

# A HISTORIC HANDSHAKE

The partnership between Elemon and Corsair is making history as the first handshake between a giant name from the traditional sector, and a gaming project from the burgeoning market of cryptocurrencies in general and NFTs in particular.

Together, we are establishing a multifaceted partnership that aims towards a sustainable future. Specifically, Corsair will not only be a strategic investor and marketing partner of Elemon, but will also collaborate extensively with Elemon throughout the product development process. The Elemon game will thus be a co-product of our talented developers together with world experts from Corsair.

# OUR VISION AND MISSION

## VISION

Elemon strongly believes that in the near future, the Blockchain-based play-to-earn market will grow exponentially and become one of the major pillars of this digital era.

With Elemon, we hope that the increasingly strong Blockchain-applied financial market will reach even further, finding its way to every corner of the world

## MISSION

Elemon carries the mission to build a groundbreaking project, in which players can benefit from their participation and investment, towards a mutual sustainable future.

Elemon carries the mission to enact the movement of a huge wave of traditional market players to the NFT market, which promises to make the crypto market ever more competitive and dynamic.

Elemon carries the mission to succeed, so that more and more corporations from the traditional market will invest in blockchain projects, creating a robust and dynamic wave of investments, driving the crypto market further and stronger.

## WHAT IS ELEMON?

---

Elemon is a Pokemon-inspired game that was built by our top game developers and experienced experts in blockchain & gaming.

Our unique feature is the new generation IDLE RPG mechanism. Elemon will provide gamers with exciting, realistic experiences, eye-catching graphics, and particularly financial benefits without requiring them to spend much time.

With this special feature, we are confident to reach and expand to a large number of people who do not have too much time to spend in games every day but still want to play and earn.

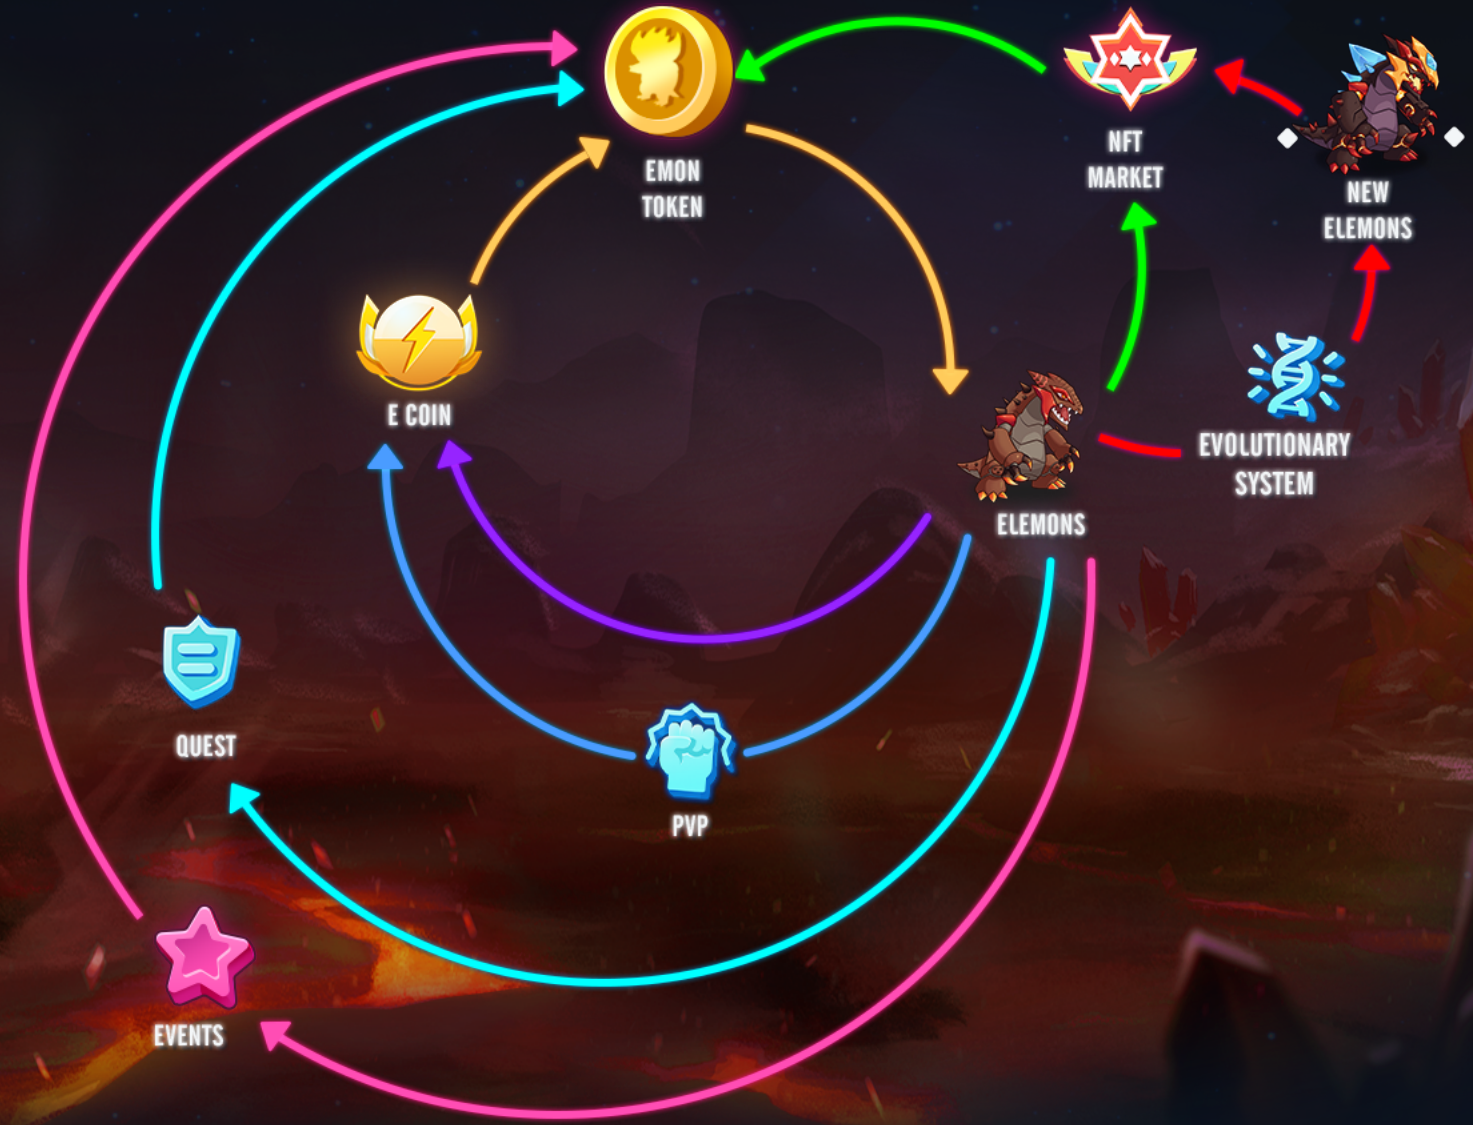

# GAMEPLAY AND FEATURES

Players summon Elemons and lead them to restore peace to the world of Elematrix and earn rewards after battles. Besides, players can stake Elemon to earn more profit.
